Special Issue on Generation of granitic rocks and deep crustal processes, edited by J.D. Clemens, D.H. Hutton

Preface vii

Hercynian late-post-tectonic granitic rocks from the Fornos de Algodres area (Northern Central Portugal)
M.R. Azevedo and J. Nolan 1
Fluids, P–T paths and the fates of anatectic melts in the Earth's crust
J.D. Clemens and G.T.R. Droop 21
Compressional granite-emplacement model: structural and magnetic study of the Trives Massif (NW Spain)
T. Román-Berdiel, A. Aranguren, J. Cuevas and J.M. Tubía 37
Interpreting magmatic fabric patterns in plutons
S.R. Paterson, T.K. Fowler Jr., K.L. Schmidt, A.S. Yoshinobu, E.S. Yuan and R.B. Miller 53

Research Papers
Reaction textures in scapolite–wollastonite–grossular calc-silicate rock from the Kerala Khondalite Belt, Southern India: evidence for high-temperature metamorphism and initial cooling
M. Satish-Kumar and S.L. Harley 83
Crustal contamination and fluid/rock interaction in the carbonatites of Fuerteventura (Canary Islands, Spain): a C, O, H isotope study
A. Demény, A. Ahijado, R. Casillas and T.W. Vennemann 101
Geochemical evolution of peraluminous plutons in southern Nova Scotia, Canada—a pegmatite-poor suite
K.L. Currie, J.B. Whalen, W.J. Davis, F.J. Longstaffe and B.L. Cousens 117
Fluid and melt inclusion evidence for the origin of idiomorphic quartz crystals in topaz-bearing granite from the Salmi batholith, Karelia, Russia
M. Poutiainen and T.F. Scherbakova 141
